Project Name: **Farmer Market Sales & Insights (2022–2025)**

Farmer Market Sales & Insights (2022–2025)

Executive Overview Dashboard

Objective

This dashboard provides a high-level summary of farmer market sales performance. It is designed for quick business understanding by management and stakeholders, enabling them to assess revenue, volume, geographic performance, and payment behavior at a glance.

Key Filters

The dashboard includes the following interactive filters to refine analysis:

- **Years:** View sales data for selected years
- **Month** – View sales data for selected months
- **Category** – Filter results by product category
- **State** – Analyze state-level performance
- **Season** – Understand seasonal impact on sales

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Key Performance Indicators (KPIs)

The top section highlights core business metrics:

- **Total Revenue:** ₹521M
- **Total Quantity Sold:** 6.4M units
- **Distributed Farmers:** 500
- **Total Markets:** 5

These KPIs summarize overall business scale and operational reach for the selected year.

Visual Analysis

1. Monthly Sales

- **Chart Type:** Line Chart
- Displays total sales trends from January to December
- Helps identify monthly fluctuations and overall sales movement across the year

2. State-wise Sales

- **Chart Type:** Bar Chart
- Compares total sales across states
- Maharashtra leads in sales, followed by Delhi, Uttar Pradesh, and Karnataka

3. Payment Mode by Sales

- **Chart Type:** Donut Chart
- Sales distribution by payment mode:
    - Cash
    - UPI
    - Card
- Shows nearly balanced contribution across all payment methods

4. Revenue per Market

- **Chart Type:** Bar Chart
- Compares revenue generated by individual markets:
    - Delhi Azadpur
    - Mumbai Mandi
    - Pune Mandi
    - Lucknow Mandi
    - Bengaluru Market
- Highlights top-performing markets based on revenue contribution

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Navigation

The dashboard includes navigation buttons for seamless movement across report pages:

- Executive Overview Dashboard
- Sales Performance Dashboard
- Product & Category Insights Dashboard
- Farmer Performance Dashboard
- Market & Geography Dashboard

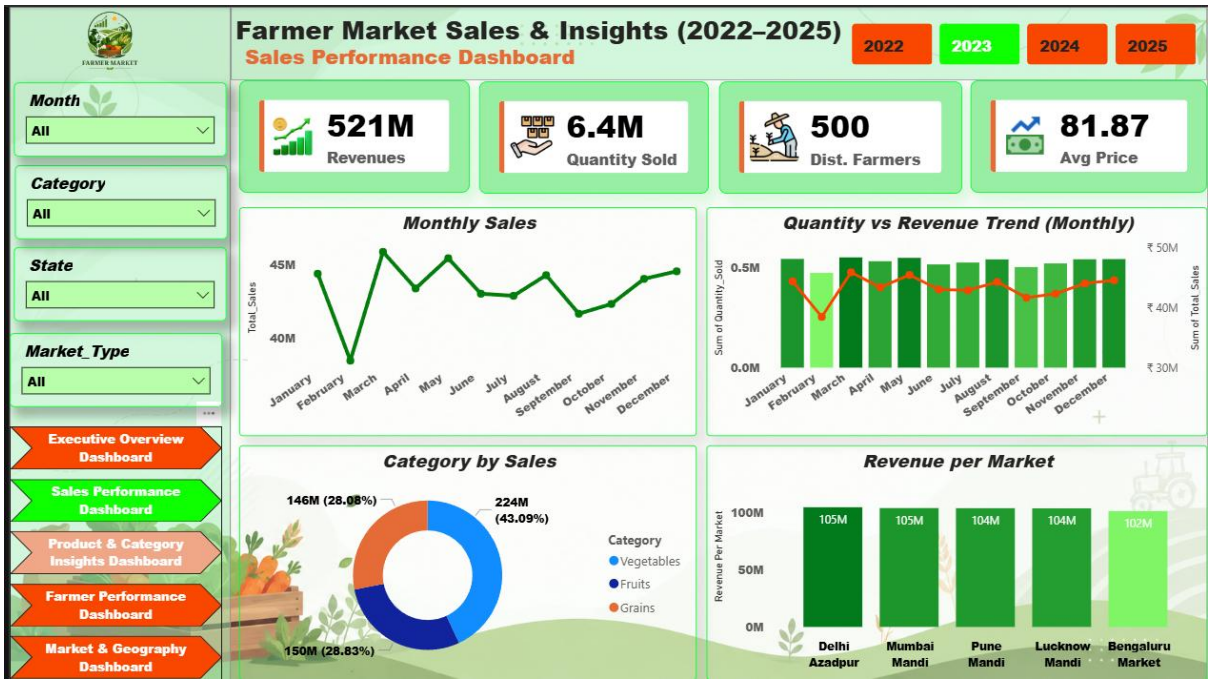

Business Value

This Executive Overview Dashboard enables:

- Quick understanding of overall sales performance
- Comparison across states and markets
- Visibility into customer payment preferences
- Efficient decision-making through a single consolidated view

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Sales Performance Dashboard

Objective

The Sales Performance Dashboard focuses on analyzing revenue and quantity trends to support sales and operations teams. It provides insights into monthly performance, category contribution, pricing, and market-level revenue distribution.

Key Filters

The dashboard allows interactive analysis using the following filters:

- **Years:** View sales data for selected years
- **Month** – Analyze sales for specific months
- **Category** – View performance by product category
- **State** – Filter results by state
- **Market Type** – Analyze performance by market classification

Key Performance Indicators (KPIs)

The top KPIs summarize overall sales performance:

- **Total Revenue:** ₹521M
- **Total Quantity Sold:** 6.4M units
- **Distributed Farmers:** 500
- **Average Price:** ₹81.87

Project Name: **Farmer Market Sales & Insights (2022–2025)**

These KPIs provide a quick snapshot of revenue scale, sales volume, farmer participation, and pricing level.

Visual Analysis

1. Monthly Sales

- **Chart Type:** Line Chart
- Displays total monthly sales from January to December
- Helps track revenue movement and identify monthly ups and downs

2. Quantity vs Revenue Trend (Monthly)

- **Chart Type:** Combo Chart (Bar + Line)
- Bars represent **Quantity Sold**
- Line represents **Total Revenue**
- Enables comparison between sales volume and revenue trends across months

3. Category by Sales

- **Chart Type:** Donut Chart
- Sales contribution by category:
    - Vegetables
    - Fruits
    - Grains
- Shows proportional contribution of each category to total sales

4. Revenue per Market

- **Chart Type:** Bar Chart
- Compares revenue generated by individual markets:
    - Delhi Azadpur
    - Mumbai Mandi
    - Pune Mandi
    - Lucknow Mandi
    - Bengaluru Market
- Highlights relative performance of each market

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Navigation

The dashboard includes page navigation buttons for easy movement across reports:

- Executive Overview Dashboard
- Sales Performance Dashboard
- Product & Category Insights Dashboard
- Farmer Performance Dashboard
- Market & Geography Dashboard

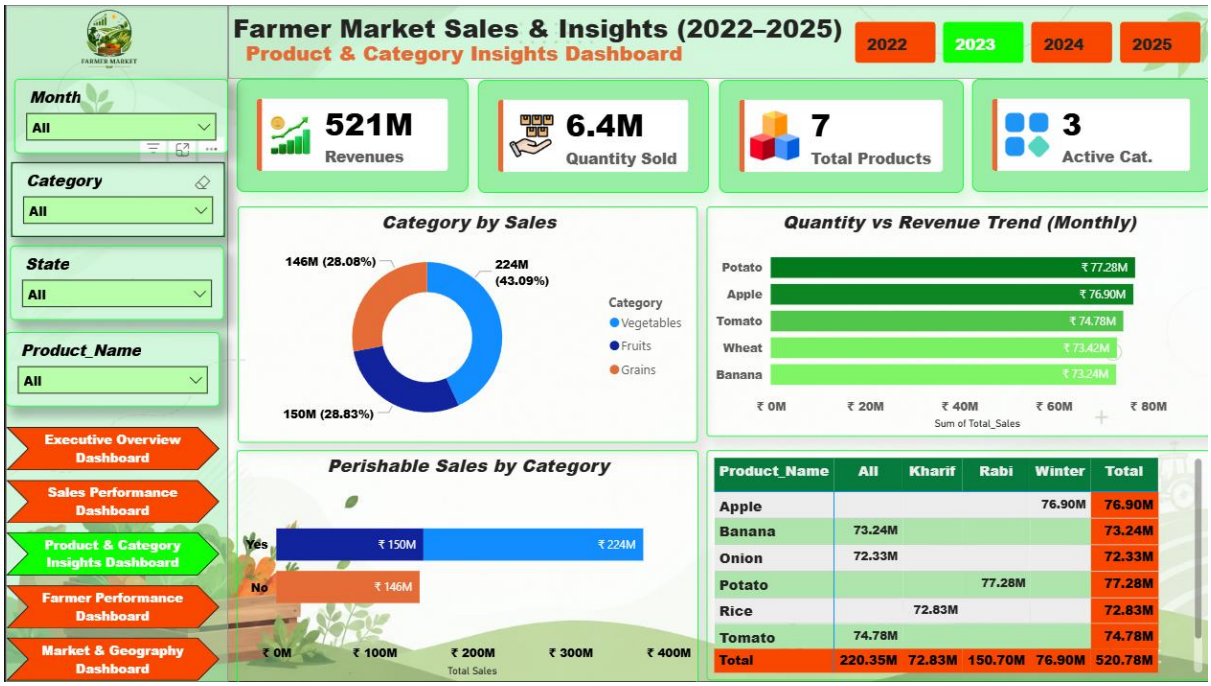

Business Value

This dashboard helps:

- Monitor monthly sales and revenue patterns
- Compare quantity sold against revenue trends
- Understand category-wise sales contribution
- Evaluate market-level revenue performance

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Product & Category Insights Dashboard

Objective

The Product & Category Insights Dashboard focuses on analyzing product performance, category contribution, seasonal sales distribution, and revenue generation across different agricultural products. It provides valuable insights to support inventory planning, product strategy, and sales optimization decisions.

Key Filters

The dashboard allows interactive analysis using the following filters:

- **Years** – View sales data for selected years
- **Month** – Analyze product sales for specific months
- **Category** – View performance by product category
- **State** – Filter sales results by state
- **Product Name** – Analyze individual product performance

Key Performance Indicators (KPIs)

The top KPIs summarize overall product and category performance:

- **Total Revenue:** ₹2.09Bn
- **Total Quantity Sold:** 25.5M Units
- **Total Products:** 7
- **Active Categories:** 3

Project Name: **Farmer Market Sales & Insights (2022–2025)**

These KPIs provide a quick overview of overall sales value, sales volume, product diversity, and category activity.

Visual Analysis

1. Category by Sales

• **Chart Type:** Donut Chart
• Displays total revenue contribution by product category:

o Vegetables
o Fruits
o Grains

• Category-wise sales distribution:

o **Vegetables:** ₹897M (42.98%)
o **Fruits:** ₹599M (28.72%)
o **Grains:** ₹591M (28.31%)

• Helps identify the most profitable category and understand category contribution to overall revenue.

2. Top Products by Revenue

• **Chart Type:** Horizontal Bar Chart
• Compares revenue generated by leading products:

o Onion – ₹301.38M
o Banana – ₹299.92M
o Tomato – ₹299.51M
o Apple – ₹299.32M
o Rice – ₹298.84M

• Highlights top-performing products contributing the highest revenue.

3. Perishable Sales by Category

• **Chart Type:** Stacked Bar Chart
• Compares sales performance of:

o **Perishable Products (Yes)** – ₹1,496M
o **Non-Perishable Products (No)** – ₹591M

• Provides insights into revenue dependence on perishable and non-perishable product categories.
• Helps support inventory management and storage planning decisions.

Project Name: **Farmer Market Sales & Insights (2022–2025)**

4. Seasonal Product Sales Analysis

• **Chart Type:** Matrix/Table
• Displays product-wise sales across agricultural seasons:

o All Season
o Kharif
o Rabi
o Winter

• Seasonal Revenue Summary:

o **All Season:** ₹900.81M
o **Kharif:** ₹298.84M
o **Rabi:** ₹587.82M
o **Winter:** ₹299.32M

• Enables identification of seasonal demand patterns and product performance across growing cycles.

Navigation

The dashboard includes page navigation buttons for seamless movement across reports:

• Executive Overview Dashboard
• Sales Performance Dashboard
• Product & Category Insights Dashboard
• Farmer Performance Dashboard
• Market & Geography Dashboard

Business Value

This dashboard helps:

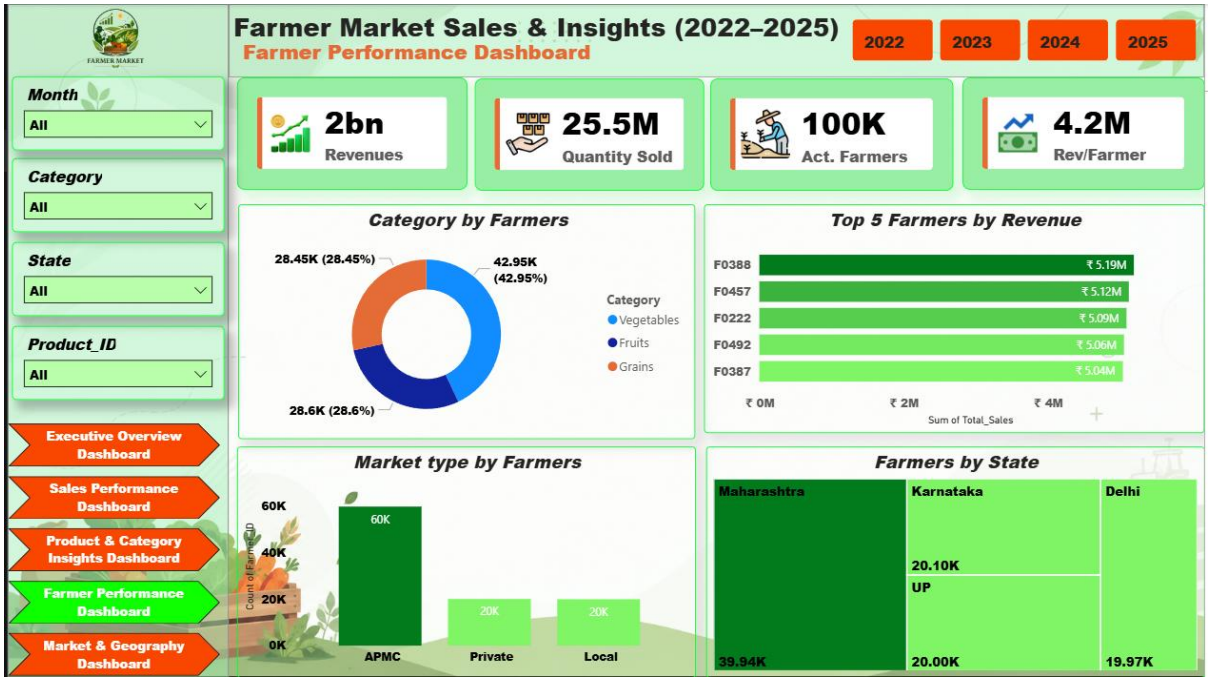

• Monitor category-wise sales contribution and revenue performance
• Identify top-performing products driving business growth
• Analyze revenue distribution between perishable and non-perishable products
• Evaluate seasonal sales trends and agricultural demand patterns
• Support inventory planning, procurement, and product strategy decisions
• Improve forecasting and resource allocation based on category and product performance

Key Insights

• **Vegetables** are the highest revenue-generating category, contributing **42.98%** of total sales.
• **Onion** is the top-performing product with revenue of **₹301.38M**.
• **Perishable products account for a significantly larger share of total revenue** compared to non-perishable products.
• **Rabi season generates the highest seasonal revenue (₹587.82M)**, indicating strong demand during this crop cycle.
• Revenue distribution across categories remains balanced, reducing reliance on a single product segment.
• Seasonal analysis highlights opportunities for targeted inventory planning and demand forecasting across different crop seasons.

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Farmer Performance Dashboard:

Objective

The Farmer Performance Dashboard focuses on analyzing farmer participation, revenue contribution, market distribution, and category-wise engagement. It provides valuable insights to support farmer management, market planning, procurement strategies, and agricultural business growth.

Key Filters

The dashboard allows interactive analysis using the following filters:

- **Years** – View farmer performance data for selected years
- **Month** – Analyze farmer activity for specific months
- **Category** – View farmer participation by product category
- **State** – Filter farmer performance by state
- **Product ID** – Analyze farmer contribution for specific products

Key Performance Indicators (KPIs)

The top KPIs summarize overall farmer performance:

- **Total Revenue:** ₹2.09Bn
- **Total Quantity Sold:** 25.5M Units
- **Active Farmers:** 100K
- **Revenue per Farmer:** ₹4.2M

These KPIs provide a quick overview of overall sales performance, farmer participation, production volume, and average revenue generated per farmer.

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Visual Analysis

1. Category by Farmers

• **Chart Type:** Donut Chart
• Displays farmer distribution across product categories:

o Vegetables
o Fruits
o Grains

• Category-wise farmer participation:

o **Vegetables:** 42.95K (42.95%)
o **Fruits:** 28.60K (28.60%)
o **Grains:** 28.45K (28.45%)

• Helps identify categories with the highest farmer involvement and participation levels.

2. Top 5 Farmers by Revenue

• **Chart Type:** Horizontal Bar Chart
• Compares revenue generated by the highest-performing farmers:

o **F0388** – ₹5.19M
o **F0457** – ₹5.12M
o **F0222** – ₹5.09M
o **F0492** – ₹5.06M
o **F0387** – ₹5.04M

• Highlights the top revenue-contributing farmers and enables performance benchmarking.

3. Market Type by Farmers

• **Chart Type:** Column Chart
• Displays farmer distribution across market types:

o **APMC:** 60K Farmers
o **Private:** 20K Farmers
o **Local:** 20K Farmers

• Shows farmer participation across different marketing channels.
• Helps evaluate the dependence on specific market structures.

4. Farmers by State

• **Chart Type:** Treemap
• Displays farmer distribution across major states:

o **Maharashtra:** 39.94K Farmers
o **Karnataka:** 20.10K Farmers

Project Name: **Farmer Market Sales & Insights (2022–2025)**

o **Uttar Pradesh:** 20.00K Farmers
o **Delhi:** 19.97K Farmers

• Provides a geographical view of farmer concentration across regions.
• Supports regional planning and resource allocation decisions.

Navigation

The dashboard includes page navigation buttons for seamless movement across reports:

• Executive Overview Dashboard
• Sales Performance Dashboard
• Product & Category Insights Dashboard
• Farmer Performance Dashboard
• Market & Geography Dashboard

Business Value

This dashboard helps:

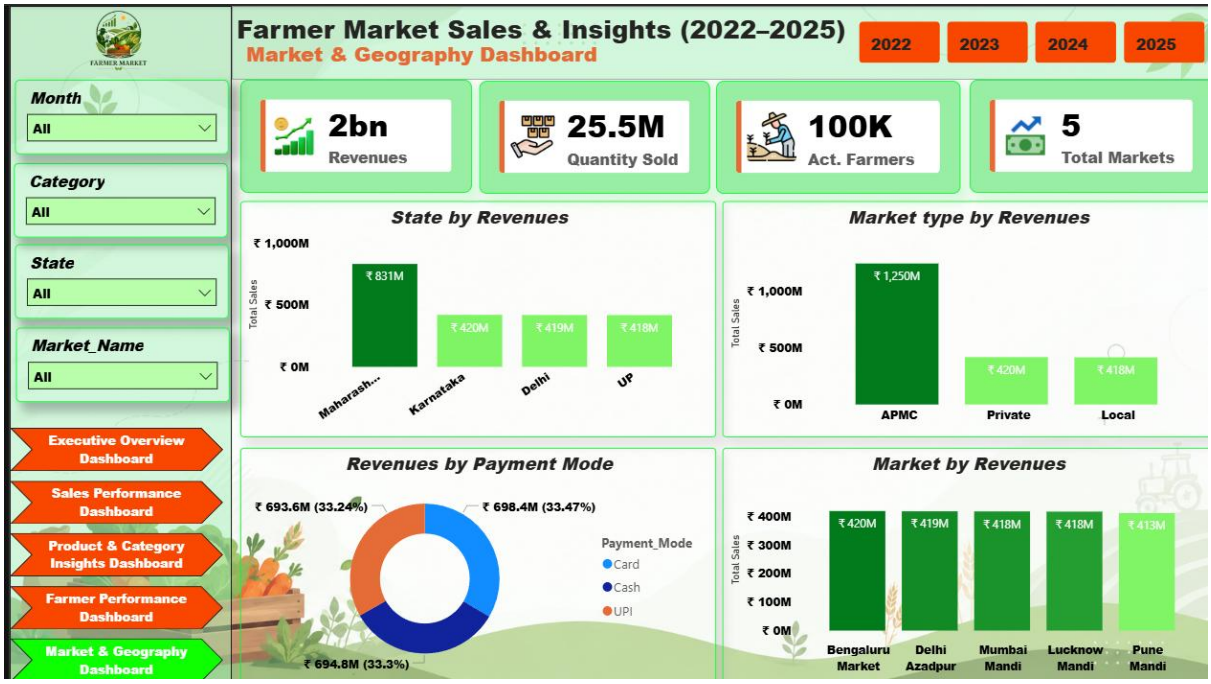

• Monitor farmer participation across product categories
• Identify top-performing farmers contributing maximum revenue
• Analyze farmer distribution across different market types
• Evaluate regional concentration of farmers by state
• Support procurement planning and farmer engagement strategies
• Improve resource allocation and agricultural outreach programs
• Enable data-driven decision-making for farmer performance management

Key Insights

• **Vegetables account for the highest farmer participation**, representing **42.95%** of total farmers.
• **Farmer F0388 is the highest revenue contributor**, generating **₹5.19M** in revenue.
• **APMC markets dominate farmer participation**, accounting for **60K farmers**, significantly higher than Private and Local markets.
• **Maharashtra has the largest farmer base**, with **39.94K active farmers**, making it the most significant contributor among states.
• Farmer participation is well distributed across Fruits and Grains categories, ensuring balanced agricultural production.
• The dashboard highlights strong farmer engagement and provides a foundation for targeted regional and market-based development initiatives.

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Market & Geography Dashboard

Objective

The Market & Geography Dashboard focuses on analyzing revenue distribution across states, market types, payment methods, and individual markets. It provides valuable insights into geographical performance, market contribution, customer payment preferences, and revenue concentration to support strategic expansion and market optimization decisions.

Key Filters

The dashboard allows interactive analysis using the following filters:

- **Years** – View market performance data for selected years
- **Month** – Analyze revenue for specific months
- **Category** – View market performance by product category
- **State** – Filter results by state
- **Market Name** – Analyze performance of individual markets

Key Performance Indicators (KPIs)

The top KPIs summarize overall market and geographical performance:

- **Total Revenue:** ₹2.09Bn
- **Total Quantity Sold:** 25.5M Units
- **Active Farmers:** 100K
- **Total Markets:** 5

Project Name: **Farmer Market Sales & Insights (2022–2025)**

These KPIs provide a quick overview of revenue generation, sales volume, farmer participation, and market coverage.

Visual Analysis

1. State by Revenues

• **Chart Type:** Column Chart
• Displays revenue generated across major states:

o **Maharashtra** – ₹831M
o **Karnataka** – ₹420M
o **Delhi** – ₹419M
o **Uttar Pradesh (UP)** – ₹418M

• Helps identify high-performing regions and compare state-wise revenue contribution.
• Supports regional business planning and investment decisions.

2. Market Type by Revenues

• **Chart Type:** Column Chart
• Compares revenue generated through different market types:

o **APMC** – ₹1,250M
o **Private** – ₹420M
o **Local** – ₹418M

• Highlights the contribution of each market structure to total revenue.
• Helps evaluate the effectiveness of different sales channels.

3. Revenues by Payment Mode

• **Chart Type:** Donut Chart
• Displays revenue distribution across payment methods:

o **Card** – ₹698.4M (33.47%)
o **Cash** – ₹694.8M (33.30%)
o **UPI** – ₹693.6M (33.24%)

• Shows customer payment preferences and transaction distribution.
• Indicates a balanced adoption of all payment modes.

4. Market by Revenues

• **Chart Type:** Bar Chart
• Compares revenue generated by individual markets:

o **Bengaluru Market** – ₹420M
o **Delhi Azadpur** – ₹419M

Project Name: **Farmer Market Sales & Insights (2022–2025)**

o **Mumbai Mandi** – ₹418M
o **Lucknow Mandi** – ₹418M
o **Pune Mandi** – ₹413M

• Highlights the relative performance of individual markets.
• Supports market-level performance evaluation and resource allocation.

Navigation

The dashboard includes page navigation buttons for seamless movement across reports:

• Executive Overview Dashboard
• Sales Performance Dashboard
• Product & Category Insights Dashboard
• Farmer Performance Dashboard
• Market & Geography Dashboard

Business Value

This dashboard helps:

• Monitor geographical revenue distribution across states
• Compare revenue performance across different market types
• Understand customer payment mode preferences
• Evaluate revenue contribution from individual markets
• Identify high-performing regions and sales channels
• Support market expansion and investment decisions
• Improve resource allocation and operational planning across markets

Key Insights

• **Maharashtra is the highest revenue-generating state**, contributing **₹831M** in revenue.
• **APMC markets dominate revenue generation**, contributing **₹1,250M**, significantly higher than Private and Local markets.
• Revenue distribution across **Card, Cash, and UPI payments is almost equal**, indicating diversified customer payment behavior.
• **Bengaluru Market is the top-performing market**, generating **₹420M** in revenue.
• Revenue contribution across Delhi Azadpur, Mumbai Mandi, Lucknow Mandi, and Pune Mandi remains balanced, demonstrating strong market stability.
• The dashboard provides valuable insights for geographical expansion, channel optimization, and market-focused business growth strategies.

Project Name: **Farmer Market Sales & Insights (2022–2025)**

DAX Function used:

1. Total Sales = SUM(farmmarket_Dataset[Total_Sales])

2. Revenue Per Market = DIVIDE([Total Sales], DISTINCTCOUNT(farmmarket_Dataset[Market_Name]))

3. Avg. Revenue Per Farmers = DIVIDE([Total Sales], DISTINCTCOUNT(farmmarket_Dataset[Farmer_ID]))

Project Conclusion

This project presents a comprehensive **Farmer Market Sales & Insights Dashboard** developed using **Microsoft Power BI**. The dashboard provides interactive visualizations and analytical insights related to sales performance, product categories, farmer contribution, market performance, and geographical distribution.

The dataset used in this project was stored in **CSV file format** and imported into Power BI for data modeling, transformation, and visualization. The data used is a **dummy dataset generated using Artificial Intelligence (AI)** for educational and project demonstration purposes. The dataset contains approximately **100,000 records (100K rows)** and was specifically created to simulate real-world agricultural sales and market operations.

The project demonstrates the use of key Power BI features, including:

- Data Cleaning and Transformation using Power Query
- Data Modeling and Relationships
- DAX Measures and Calculations
- KPI Cards and Interactive Filters
- Charts, Treemaps, Donut Charts, and Tables
- Dashboard Navigation and User-Friendly Reporting

This is a **beginner-level Power BI project** designed to showcase fundamental business intelligence concepts, dashboard development techniques, and data visualization skills. The project helps in understanding how raw data can be transformed into meaningful insights to support business decision-making.

Project Name: **Farmer Market Sales & Insights (2022–2025)**

Tools & Technologies Used

- **Microsoft Power BI Desktop**
- **CSV Data Source**
- **Power Query Editor**
- **DAX (Data Analysis Expressions)**
- **AI-Generated Dummy Dataset (100K Records)**

Disclaimer

The dataset used in this project is an **AI-generated dummy dataset** created solely for learning, portfolio, and demonstration purposes. The data does not represent any real farmers, markets, businesses, organizations, or financial transactions. All values, names, and records are fictional and intended only to demonstrate Power BI reporting and analytics capabilities.

Project Name: **Farmer Market Sales & Insights (2022–2025)**
